He was then whipped with leather lines. His long hair was clipped ord mixed with the tar which was applied to his body. The men after administering the lashing forced him to put on his clothes and brought him back to the city, leaving him out near the cametery with the admonition that he had better leave town within 24 hours.

NOTICE!

To Whom It May Concern-

In view of the fact that there has been some complaint and a number of my neighbors have gone so far as to sign their names to a petition protesting against my building a store at 1646 East Second street, I desire to make the following statement: I am not making this move because I want to or be-cause I believe it to be the best business policy. I am ordered and commanded by my landlord to vacate my present place of business March 1st, or pay him THREE HUNDRED DOLLARS per month rent on this small building. I want to ask you, as fairminded citizens, if you were confronted with the same conditions as outlined above and you owned real estate situated just as advantageously as the property you were compelled to vacate, would you not erect a building on your premises and continue your legitimate business the same as I propose doing? I believe you would, and I believe I would deserve to be called a quitter if I didn't.

Some of the reasons why they object to my building a grocery store on my property at 1646 East Second are so absurd that they are amusing. Two of my friends suggested that a grocery store would have a tendency to bring roaches and mice into the com-munity. I want to state emphatically that I will eat every cockroach and mouse that they can find in my store. They said that it would increase the in my store. They said that it would increase the fire hazard because the building will be of frame construction. Why is a grocery store more likely to catch fire than a residence? I see no brick homes in this vicinity. They say that it will obstruct their view. True, buildings have a tendency to do that. Not only stores obstruct the view, but so do houses, churches, apartment buildings and all other legitimate and useful buildings. mate and useful buildings.

I am genuinely sorry that my friends and neighbors have taken this pessimistic view of the matter. I am sincere in my belief that they are wrong and that they will come to realize that they are wrong before

I am established on the corner many days.

In the moving of the old building now located on these lots, the erection of the store building and all the other work pertaining to this job, I will furnish employment to a dozen or more men, some of whom have not had a day's work in months. Is not this feature alone worth some consideration? This is probably lost on some of you who have comfortable homes, big automobiles and good positions.

One thing more I want to ask you: How would you like to live in a community fifteen or twenty blocks.
